Munich-based businessman Christian Zott undertook a 5000 kilometre long journey: on foot, almost 40 kilometres a day, through the South of Europe from the most westerly point in Portugal to the Eastern border on the Bosphorus. The book, developed during this hike, is an unusual reflection on the forms of love in our times. Mind map is a term used by psychologists and managers referring to a cognitive technique for ordering and visualising one's thoughts. Christian Zott uses this method to examine the phenomenon of love in greater detail. His novel 'Mind Map of Love' consists of 21 chapters written in the form of complete, self-contained short stories. These take place at various locations mostly European cities but also pastoral landscapes which are never specifically named but which are always clearly identifiable. At the end of the individual stories there are turning points at which the reader him/herself can determine the future of the two main figures, Romeo and Juliet. Each of these episodes forms a potential point in a universal love story. Corresponding to the external events, the descriptions of the inner development of the protagonists seek to capture the various stages of this major emotion in the shape of concise psychograms of the lovers. The result is a 'compendium' of the many manifestations of love, with the most beautiful and the ugliest, the most sincere and the lowest, the most animalistic and the most tender of emotions. Travel itself becomes a key metaphor for the concept of love in this book. Being mindful and paying attention to one's partner, the environment and oneself are the takeaways subtly offered to the reader...
