Bio-butanol: A road forward
for sustainable future fuel

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Over the last few years, Interest in biobutanol, a sustainable vehicle fuel, is increasing due to rising oil prices and concerns of surrounding climate change and energy crisis. Recently, improved technologies have been developed for the biobutanol fermentation process: higher butanol concentrations and productivities are achieved during fermentation, separation and purification techniques are less energy intensive. Incorporating these technologies into a biorefinery concept will contribute toward the development of an economically viable...
