## WATER SHALL FLOW FROM THE ROCK

Book Condition: New. Publisher/Verlag: Springer, Berlin | Hydrogeology and Climate in the Lands of the Bible | The reconstruction of climatic changes in the Upper Quaternary is especially interesting in light of their impact on man and his environment. The knowledge will help face the problems that may arise in the future. The author focusses on a new model of climatic changes in the last 6000 years, and their influence on the peoples of the Middle East. He combines results from the natural sciences with historical documents and archeological findings. Thus various biblical events can be explained by using hydrogeological and paleoclimatic developments. Water shall flow from the Rock is an exciting book for geoscientists interested in the recent past and for those interested in the flourishing and decline of civilizations in the Middle East. Many times when the author saw the bedouins of southern Sinai excavate their wells in the crystalline rocks, from which this part of the peninsula is built, the story of Moses striking the rock to get water came to mind. The reader will, indeed, find in this book the description for a rather simple method by which to strike the rock to get water in the wilderness of Sinai. Yet this method was not invented by the author nor by any other modern hydrogeologist, but was a method that the author learned from the bedouins living in the crystalline mountains of southern Sinai. These bedouins, belonging to the tribe of the Gebelia (the "mountain people"), live around the monastery of Santa Katerina and, according to their tradition, which has been confirmed by historical research, were once Christians who were brought by the Byzantine emperor, Justinian, from the Balkans in the 6th century A. D. to be servants to the priests of the monastery. They know...
