Not illustrated. 1921 Excerpt: .14.--Distribution of 80 cities according to the percentage of pupils retarded three years and four years or more in 1908 and 1915. Table 13.--Frequency of the ratios between the number of boys and ( girls retarded one year or more and the total number enrolled in 1908 and 1918. The reduction in the percentage of over-age pupils since 1908 is pictured in Tables 10, 11, 12, and 13, and in figures 12, 13, 14, and 15. In every instance in the diagrams the mode has shifted to the left for both boys and girls. The general reduction in the percentage of over-age pupils is conducive to better teaching. In some of the cities these over-age pupils have been segregated from the younger pupils of their grades and placed in special schools and classes. The subtle suggestion incident to a study of this kind is that cities which have not provided special work for retarded or subnormal pupils should do so if the proportion of over-age pupils justifies such a venture. In view of the norms established in this study, each city superintendent should carefully analyze the status of the pupils in his school system to determine whether special classes should be provided for the over-age children. A study of special schools and classes for the subnormal children is found in another chapter of this Biennial Survey of Education. Boy Jx ) On O - 0t 0t IA 4 i 5 4 (M rt Mt T...
