Reviews

Very good eBook and valuable one. Better than never, though I am quite late in starting to read this one. I am very easily satisfied with a publication.

(Brianne Heidenreich)

FINAL ENVIRONMENTAL ASSESSMENT FOR THE BOSTON ARCHITECTURAL COLLEGE S (BAC) URBAN SUSTAINABILITY INITIATIVE FOR THE RENOVATION OF PUBLIC ALLEY #444, BOSTON, MASSACHUSETTS (DOE/EA-1885) (PAPERBACK)

Createspace Independent Publishing Platform, United States, 2013. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.DOE prepared this EA to evaluate the potential environmental consequences of providing \$1.6 million in financial assistance pursuant to a Congressional earmark to Boston Architectural College (BAC) for its Urban Sustainability Initiative for the Renovation of Public Alley #444. The financial assistance would be in the form of cost-shared funding. This EA analyzes the potential environmental impacts of DOE s proposed action of providing the grant funding and the No-Action Alternative. In this EA, DOE evaluated potential environmental impacts resulting from the proposed project on air quality, geology and soils, biological resources - sensitive species, water resources, cultural/historic resources, traffic, noise, aesthetics and visual resources, and socioeconomic resources. The proposed project would be designed in compliance with all federal and state regulations, would reduce storm water runoff into the Charles River Basin and would become an ongoing tool for the BAC curriculum and community public education. The project would include the installation of 13 to 15 open loop geothermal wells to provide heating and cooling energy to BAC s facilities; the installation of a green screen trellis system, planting soils, concrete pavement, pavers, landscaping; and mechanical upgrades (plumbing and electrical) to accommodate the geothermal solution into the facilities. Operation of the geothermal wells would not result in any increase in noise in the vicinity. The aesthetics of Boston s Historic Back Bay District community would be enhanced with the addition of the green screen trellis system, planting soils, concrete pavement, and pavers. After consulting with Massachusetts State Historic Preservation Office (SHPO) DOE has determined that this project would not have an adverse effect on the historical Back Bay District. As part of the Green Alley Phase II, the green screen...
